Trần Đức Viên is an Associate Professor of the Hanoi University of Agriculture, where he has served as the Rector since late 2006. He teaches courses on agroecology, farming systems research and development, and environmental management. He played a key role in the creation of the HUA Center for Agricultural Research and Environmental Studies (CARES) and serves as its director. CARES is a multi-disciplinary center with a mandate to do research designed to help farmers enhance their knowledge, increase agricultural productivity, and encourage environmental protection and sustainable development of agriculture and rural areas. He has conducted research on upland development in Vietnam for many years, often working in collaboration with researchers from different disciplines and institutions, both national and international. While trained as a crop and land management scientist (Ph.D. from HUA, 1998), his research has focused on the relationship between the different cultures, farming systems, and the environment of Vietnam's mountains. He is particularly concerned with the relationship between the diverse indigenous cultures found in the different parts of the uplands and the farming systems on which they rely for their subsistence. He has published numerous articles, reports, and books of which the most recent are: (1) Trần Đức Viên, A.Terry Rambo, Nguyễn Thanh Lâm, eds, 2008, *Canh tác nương rẫy: Một góc nhìn* (Swidden Agriculture: A Point of View). Hanoi: Agricultural Publishing House; (2) Trần Đức Viên and Nguyễn Thanh Lâm, 2006. *Sinh thái học đồng ruộng: Giáo trình dùng cho sinh viên đại học và sau đại học* (Crop Ecology: Textbook for undergraduate and graduate levels), Hanoi: Agricultural Publishing House; and (3) Trần Đức Viên, Nguyễn Vinh Quang, Mai Văn Thành, 2005, *The Impacts of Decentralization of Forest Management on Livelihoods of Ethnic Minority Groups in the Vietnam's Uplands*, Hanoi: Agricultural Publishing House.

A. Terry Rambo is Special Professor in the Program on System Approaches in Agriculture, Faculty of Agriculture, Khon Kaen University, Thailand. He is also an Adjunct Senior Fellow of the East-West Center and a Visiting Professor at the Hanoi University of Agriculture. From 2000 to 2004 he was a Professor of the Center for Southeast Asian Studies at Kyoto University. Prior to joining

CSEAS he was a senior fellow of the East-West Center in Honolulu, where he served as Director of the Program on Environment from 1992 to 1997 and as the EWC Representative in Vietnam from 1997 to 2000. He was a lecturer in the Department of Anthropology and Sociology of the University of Malaya (1975-1980) and Visiting Professor of Social Science at the Dalat University Graduate School of Politics and Economics in Saigon (1973-1975). He has a Ph.D. in anthropology from the University of Hawaii (1972) and has conducted field research in Belize, Vietnam, and Malaysia. He has published extensively on Vietnamese culture and society, the Orang Asli of Malaysia, problems of upland development, and human ecology in Southeast Asia. His most recent book is *Searching for Vietnam*, 2004, Kyoto University Press and Trans Pacific Press.

Nguyễn Thanh Lâm is the Executive Director of the Center for Agricultural Research and Ecological Studies (CARES), Hanoi University of Agriculture, and the Chair of the Department of Environmental Technology. He holds a Ph.D. in Agronomy from Khon Kaen University (2005). His areas of specialization are agroecology, soil science, biodiversity conservation, and environmental protection. He is a country coordinator for number of regional projects on upland farming systems, neglected and underutilized plant species, plant genetic resources, cross-boundary watershed management between Vietnam and Laos, and environmental planning and management for Cambodia, Laos, and Vietnam. He has published papers in several international and Vietnamese journals, including *Agricultural Sustainability*, *Agriculture, Ecosystems and Environment*, *Agricultural Systems*, *Southeast Asian Studies*, and *Biodiversity Conservation*. His most recent books include: (1) Trần Đức Viên, A.Terry Rambo, Nguyễn Thanh Lâm, eds, 2008, *Canh tác nương rẫy: Một góc nhìn* (Swidden Agriculture: A Point of View). Hanoi: Agricultural Publishing House; (2) Trần Đức Viên and Nguyễn Thanh Lâm, 2006, *Sinh thái học đồng ruộng: Giáo trình dùng cho sinh viên đại học và sau đại học* (Crop Ecology: Textbook for undergraduate and graduate levels), Hanoi: Agricultural Publishing House.

Associate Editors

Neil L. Jamieson has spent eighteen years working in Asia, thirteen of them in Vietnam. Much of his work has been related to the intersection of culture, environment, and development in Southeast Asia. His interests and writings extend into continuity and change in Vietnamese culture, art and literature, the

sociology of development, and ethnic minority issues. He served for over two years as a Provincial Representative for the U.S. Aid mission in South Vietnam (1963-1965), including 18 months in upland areas; participated in the study of the effects of herbicide use in Vietnam for the National Academy of Sciences; worked on environmental and development issues at the East West Center (1982-1988); headed the Winrock International office in Hanoi (1993-1998); and has carried out numerous consultancies for the World Bank, FAO, the Asia Development Bank, the Swedish International Development Agency, and other organizations. He has taught at the University of Hawaii and Chaminade University in Hawaii and conducted many teaching and training seminars on the human dimensions of upland development in Vietnam in conjunction with Vietnam National University, Hanoi, and the Hanoi University of Agriculture. He co-authored, with Lê Trọng Cúc and A. Terry Rambo, *The Development Crisis in Vietnam's Mountains*, published in both Vietnamese and English. His other writings include *Understanding Vietnam* (University of California Press, 1993) and numerous articles for scholarly journals and encyclopedias, as well as working papers and consultant reports concerned with issues of upland development in Vietnam.

Stephen J. Leisz is Assistant Professor of Geography at Colorado State University in Fort Collins, Colorado. His area of specialization is the monitoring of land use / land cover change in montane mainland Southeast Asia and recent farming systems changes in the region. He has a Ph.D. in Geography from the University of Copenhagen (2007) and an M.Sc. in Environmental Monitoring, with an emphasis on remote sensing and GIS, from the University of Wisconsin-Madison (1996). He has done extended field research in Madagascar and Vietnam, where between 1997 and 2007 he carried out investigations on land use and land cover change in the Northern Mountain Region. From 1997 to 1999 he was an East-West Center Researcher working in conjunction with CRES, of the Vietnam National University, Hanoi. From 2000 to 2007 he was employed by the Institute of Geography, University of Copenhagen, to work in collaboration with the Center for Agricultural Research and Ecological Studies of Hanoi University of Agriculture in north-central and northern Vietnam. In 2007 he worked for the Bishop Museum in Honolulu, Hawaii, and continues to collaborate with museum personnel on several projects related to climate change in Melanesia. In 2008 he was a visiting fellow at Kyoto University's Center for Southeast Asian Studies and he co-organized the Demise of Swidden in Southeast Asia workshop and conference in Hanoi, Vietnam. As part of that conference he also co-organized a session assessing the recent trends in the extent of swidden in the region. He

has published several papers on farming system and land use/land cover changes in Vietnam and Yunnan, China.
